Market insights, the power demand buildout, and a featured engagement

02 **Industry Activity**
Recent transactions, public company valuation and operating metrics, and economic trends

03 **Connect With Us**
The Middle Market industrial team

October 2026 | Jared Hardin, Managing Director

01 Insights

American manufacturing has expanded for nine consecutive months, and acquirers in every industrial sector are buying capacity that already exists because skilled labor is scarce and new equipment takes a long time to arrive. Borrowing costs rose in September, and buyers have become more selective about what they pay for.

KEY INSIGHTS

01 Power and data center work earns the premium
Quanta Services ended June with $53.4 billion of backlog, up from $35.8 billion. A buyer will ask how much of yours is tied to funded power and data center work.

02 The likely buyer is an operating platform
Add-ons made up about three-quarters of buyouts in the second quarter, and Pye-Barker Fire & Safety completed 22 acquisitions in the first half. Expect a sponsor that already knows the trade.

03 Report service revenue on its own line
APi Group is working toward 60% of revenue from inspection and service. Buyers pay more for service, repair, and aftermarket revenue when it is reported apart from projects, with its renewal history.

04 Financing costs more and buyers are choosier
The Federal Reserve raised its target range to 3.75% to 4.00% on September 16. GF Data's average multiple eased to 7.0 times trailing adjusted EBITDA, from 7.3 times.

Market Insights: Q4 2026

Demand is broad, buyers are organized around platforms, and financing became more expensive in September.

WHAT IT MEANS FOR OWNERS

Strategic acquirers and private equity platforms are still buying machining, distribution, contracting, environmental, and logistics capacity that already exists.

They are paying the most for companies tied to power, data centers, aerospace, and service work that codes and regulations require.

Domestic manufacturing demand is broad

The ISM Manufacturing PMI was 54.5 in September, its ninth consecutive month of expansion, and orders for manufacturing technology reached $4.03 billion in the first seven months of the year, 37.1% ahead of 2025 (ISM; AMT data reported by MDM). Capacity utilization of 75.7% leaves most plants room to take on more work (Federal Reserve G.17).

54.5

ISM Manufacturing PMI, September

Private equity is buying through platforms it already owns

Add-on acquisitions made up about three-quarters of all buyouts in the second quarter (PitchBook), and Pye-Barker Fire & Safety completed 22 acquisitions in the first half of the year alone (Pye-Barker). The sponsor at the table for a founder-owned industrial company is usually an operating platform that already knows its trade.

13,509

US companies held by private equity

Power and data center work is the strongest source of demand

Quanta Services ended June with a backlog of $53.4 billion against $35.8 billion a year earlier (Quanta Services). Public infrastructure funding is less certain, because the surface transportation authorization expired on September 30 and highway programs are running under a continuing resolution through December 11 (AASHTO Journal).

$53.4B

Quanta Services total backlog June 2026

Recurring service revenue is valued above project revenue

APi Group is working toward 60% of revenue from inspection and service, and Transcat's service revenue grew 27% (APi Group; Transcat). Buyers pay more for service, repair, inspection, and aftermarket parts revenue when an owner reports it separately from project and product sales, with the renewal history behind it.

60%

APi Group target for inspection and service revenue

Financing costs more and buyers are more selective

Global M&A value fell 41% from the second quarter to $993 billion in the third, and the Federal Reserve raised its target range to 3.75% to 4.00% on September 16 (LSEG data reported by Reuters; Federal Reserve). GF Data's average multiple eased to 7.0 times trailing adjusted EBITDA from 7.3 times, and debt on platform acquisitions fell to 2.9 times from 3.4 times (GF Data via ACG).

7.0x

Average middle-market multiple of EBITDA, Q2

Figures are as reported by the linked sources. Middle-market multiple and debt figures are GF Data sponsor-reported averages for the first and second quarters of 2026.

Power Demand: The Buildout Reaches Every Industrial Sector

Electricity demand is growing about 2% a year, the equipment to meet it is sold out years ahead and acquirers are buying existing capacity.

The Energy Information Administration expects US electricity sales to grow about 2% in 2026 and again in 2027, driven by data center development and commercial and industrial activity (EIA). NERC raised its 10-year forecast of summer peak demand growth to 224 gigawatts from 132 (POWER Magazine), and Meta alone expects capital expenditures of $130 billion to $145 billion in 2026 (Meta).

The equipment needed to meet that demand is committed years ahead. GE Vernova's gas turbine backlog and slot reservations rose to 116 gigawatts from 100 during the second quarter (GE Vernova), and lead times for generator step-up transformers reached 160 weeks in the first quarter (Reuters, citing Wood Mackenzie). Generac's commercial and industrial sales grew 29% and its data center backlog reached about $1.6 billion (Generac).

AI Bottleneck Is Power, Not Chips

"So, it's interesting as they continue to announce all the data centers and data center sites. I've sort of always had a strong view that energy would be the constraint." Greg Abel, CEO, Berkshire Hathaway (CNBC)

"Well, I don't think it's going to come down to chips or the models that people create or the apps that we develop. I think the consistent theme you hear here is can we get the power generation to power these massive data centers." Toby Rice, CEO, EQT (EQT Corporation)

"quite frankly, the biggest issue we are now having is not a compute glut, but it's a power and it's sort of the ability to get the builds done fast enough close to power. So, if you can't do that, you may actually have a bunch of chips sitting in inventory that I can't plug in." Satya Nadella, CEO, Microsoft (Bg2 Pod)

HOW THE DEMAND REACHES EACH SECTOR

MANUFACTURING & INDUSTRIAL TECHNOLOGY

nVent agreed to buy Maverick Power, a Texas maker of switchgear and modular power for data centers, for $1.75 billion plus up to $550 million, and put the upfront payment at 11.5 times anticipated 2026 adjusted EBITDA (nVent).

INDUSTRIAL DISTRIBUTION & SERVICES

EMCOR's US Industrial Services segment grew 25.9% in the second quarter (EMCOR), and contractors with power, utility, and data center customers have kept growing in a year when refiners deferred turnaround work to 2027.

BUILDING PRODUCTS & CONSTRUCTION SERVICES

Contractors doing data center work reported 9.9 months of backlog against 8.3 months for those that are not (ABC). Limbach lowered its guidance after its gross margin fell to 21.5% from 28.0%, citing competition for skilled labor and materials in data center markets (Limbach).

ENERGY, POWER & ENVIRONMENTAL SERVICES

Mission Critical Group bought a Texas switchgear manufacturer and a transformer supplier within four months of each other (Dallas Innovates; Distribution Strategy Group), and electrical testing and commissioning is the most contested category in the power subsector.

TRANSPORTATION & LOGISTICS

Spending on data center construction was more than 73% higher in August than a year earlier (ABC analysis reported by MDM), and JK Technology Services bought a Virginia rigging company that works in data centers (Vertikal).

THE BUILDOUT IN FOUR FIGURES

224 GW

NERC 10-year forecast of summer peak demand growth, raised from 132

116 GW

GE Vernova gas turbine backlog and slot reservations

160 weeks

Lead time for generator step-up transformers

9.9 months

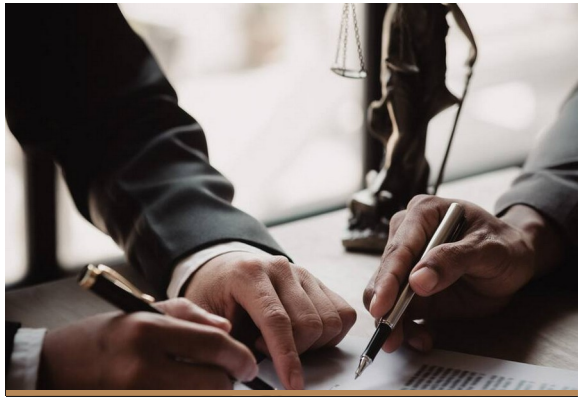

Backlog at contractors doing data center work

A buyer will ask how much of the backlog is tied to funded power and data center work, and whether the company has the technicians to perform it at the margins it has earned so far.

Transaction values and multiples are as stated by the acquirer in the linked announcement. Backlog figures are from company second-quarter reports and the ABC member survey for August 2026.

Featured Engagement: The Carmi Companies

A Laredo logistics and customs brokerage group and a Mexico manufacturing services company have combined to form an end-to-end cross-border platform.

BENCHMARK INTERNATIONAL ADVISED

THE CARMI COMPANIES

ON ITS TRANSACTION WITH

THE NEARSHORE COMPANY

Transportation & Logistics
Cross-border freight, customs brokerage, and warehousing

READ THE ANNOUNCEMENT

THE CLIENT

The Carmi Companies

Founded in 1983 in Laredo, Texas, The Carmi Companies is a single-source logistics group that coordinates land, air, and ocean freight and provides customs brokerage, warehousing, and transloading.

THE COUNTERPARTY

The Nearshore Company

Founded in 1992 in Brownsville, Texas, The Nearshore Company offers manufacturing facilities in Mexico together with employer-of-record services.

THE RATIONALE

An end-to-end cross-border platform

The combination pairs The Nearshore Company's Mexico manufacturing facilities and employer-of-record services with Carmi's logistics to form an end-to-end cross-border platform.

THE MARKET

Buyers are paying for border capability

Trade with Mexico reached a monthly record of $94.8 billion in July, 27.5% above a year earlier, and $35.9 billion of it moved through Port Laredo (Census data reported by FreightWaves). Logistics platforms have responded by buying brokers at the border, and Redwood Logistics and Imperative Logistics Group each acquired a founder-owned customs broker in Laredo this year (FreightWaves on EELCO; FreightWaves on Jose D. Gonzalez, CHB).

> *"The simplest way to describe today's market is that buyers are acquiring capabilities rather than capacity."*
>

VIEW MORE TRANSACTIONS

Company descriptions are from the announcement on benchmarkintl.com. Benchmark International counts are for the 24 months to September 30, 2026 and for engagements in progress as of October 1, 2026.

02

Industry Activity

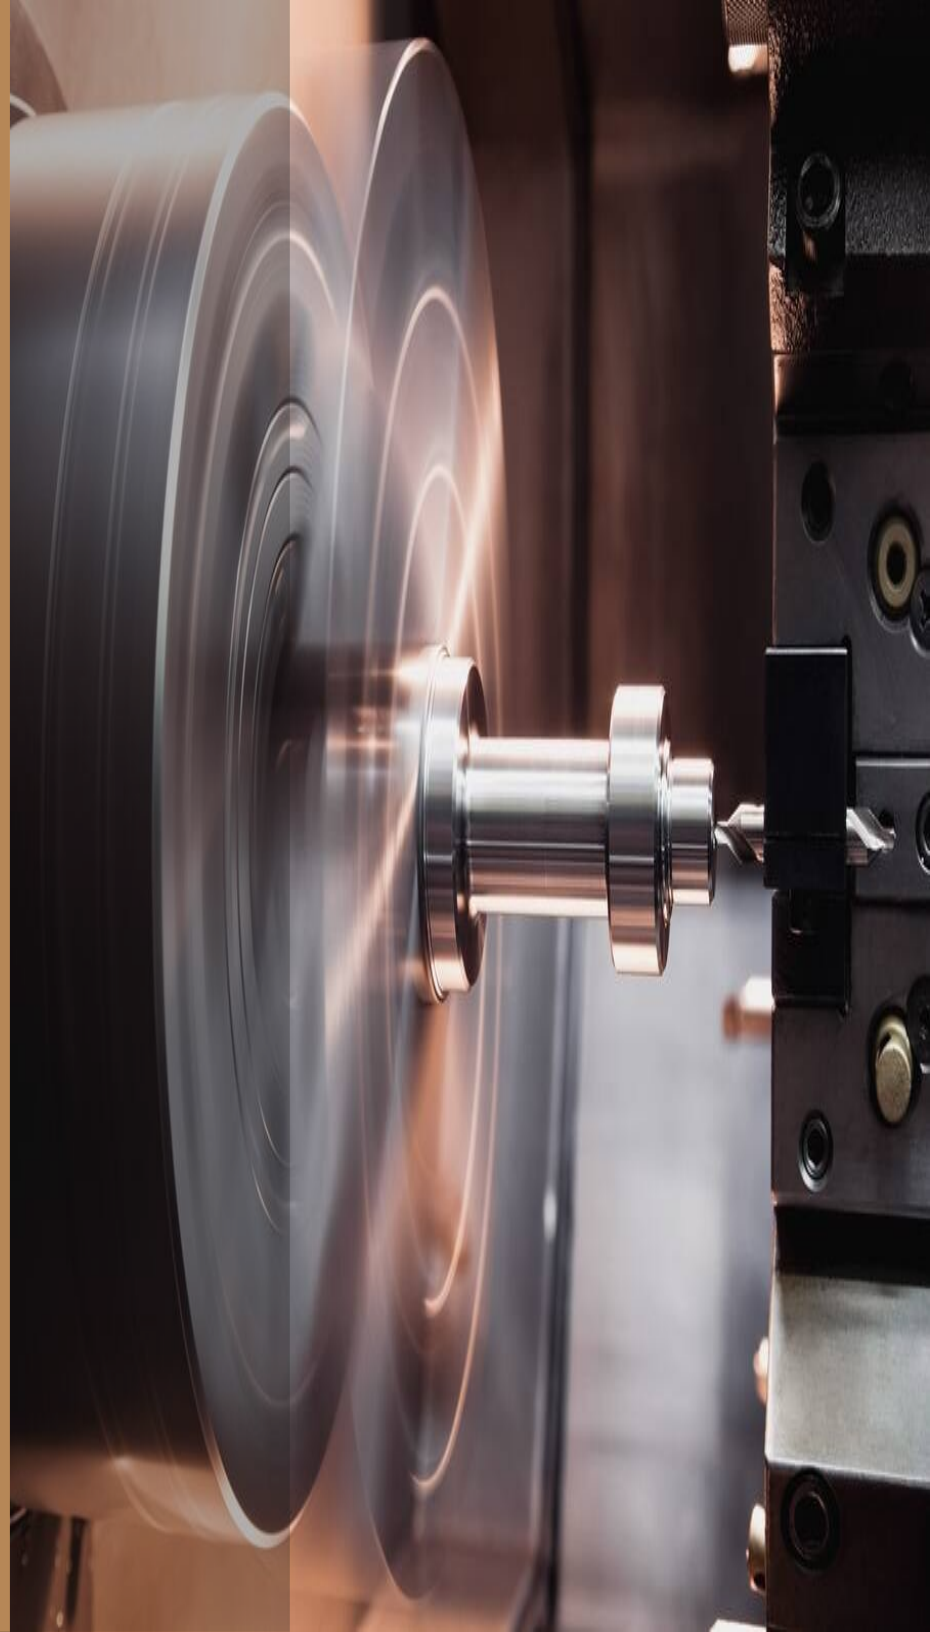

Acquirers announced transactions in every industrial sector during 2026, with sellers that ranged from founder-owned machine shops and customs brokers to companies bought by public acquirers for several billion dollars. Listed industrial companies trade at a median of 16.2 times EBITDA, and the indicators behind demand and financing are pointing in different directions.

07 Select recent industrial transactions

09 Benchmark International's industrial transactions

10 Public company performance and trends

13 Economic trends

Select Recent Industrial Transactions

Public acquirers disclosed prices of about 6 to 10 times EBITDA, and sponsor-owned platforms bought family-owned companies on undisclosed terms.

ANNOUNCED	TARGET AND ACQUIRER	BUSINESS AND TERMS	WHAT IT SHOWS
SEPTEMBER 2026 Manufacturing & Industrial Tech	**CAT PUMPS** *acquired by* **FRANKLIN ELECTRIC**	Franklin Electric acquired Cat Pumps, a Minneapolis maker of high-pressure pumps, for $350 million in cash plus up to $50 million in stock (Franklin Electric).	The upfront payment equals about 7.8 times 2025 adjusted EBITDA, by our calculation, for a business with a margin above 35%.
JULY 2026 Manufacturing & Industrial Tech	**ADVANCE MFG. CO.** *acquired by* **PRECINMAC** Centerbridge Partners	Precinmac acquired Advance Mfg. Co. of Westfield, Massachusetts, family-owned since 1961, which supplies machined components, fabrications, and Nadcap coating for defense and aerospace customers (Precinmac). Terms were not disclosed.	Sponsor-owned platforms are assembling certified aerospace and defense machining capacity, and Precinmac had acquired Precision Aerospace Holdings of Dallas in April.
JULY 2026 Distribution & Services	**FLOWORKS** *acquired by* **FERGUSON**	Ferguson agreed to buy FloWorks, a flow control distributor with about $1 billion of revenue, from Wynnchurch Capital for $1.6 billion and completed the purchase in August (MDM).	Ferguson described the price as about 10 times trailing adjusted EBITDA after including roughly $45 million of expected synergies (MDM).
JULY 2026 Distribution & Services	**METROPLEX WELDING SUPPLY** *acquired by* **MERITUS GAS PARTNERS** AEA Investors	Meritus Gas Partners acquired Metroplex Welding Supply of Dallas, a family-owned distributor of industrial gases and welding supplies founded in 1975 with five locations (MDM). Terms were not disclosed.	Meritus has announced at least five acquisitions in 2026, four of them since July, and nearly every product line now has a specialist acquirer of this kind.
SEPTEMBER 2026 Building Products & Construction	**1901 INC.** *acquired by* **LIMBACH HOLDINGS**	Limbach acquired 1901 Inc., a mechanical, electrical, and plumbing contractor in Madison, Wisconsin, that it expects to contribute about $140 million of revenue, for $63 million plus an earn-out of up to $6 million (Pulse 2.0).	The upfront payment is about 5.7 times expected 2027 adjusted EBITDA, by our calculation, just below the 6 to 9 times at which project-based contractors have traded.

Transaction values and multiples are as reported by the linked source or calculated from the figures it gives. Company names are the property of their owners and are shown for identification. Transactions advised by Benchmark International appear on page 9.

Select Recent Industrial Transactions (Continued)

Buyers in power, environmental services, and logistics paid for technicians, permits, equipment supply, and border capability they did not already have.

ANNOUNCED	TARGET AND ACQUIRER	BUSINESS AND TERMS	WHAT IT SHOWS
AUGUST 2026 Building Products & Construction	**CLARK RIGGING & RENTAL** *acquired by* **BAY CRANE**	Bay Crane acquired Clark Rigging & Rental, a crane rental, rigging, and heavy-haul company in upstate New York that had been family-owned since 1954 (RER). Terms were not disclosed.	Crane, rigging, and pump rental each have an active acquirer buying family-owned regional operators.
AUGUST 2026 Energy, Power & Environmental	**ENVIROSERVE** *acquired by* **CLEAN HARBORS**	Clean Harbors agreed to buy EnviroServe, a remediation, industrial cleaning, and emergency response company with 40 locations, from One Rock Capital Partners for $470 million (Waste Advantage).	The agreement followed Clean Harbors' $305 million deal for ES&H, which it described as 8.7 times EBITDA after synergies (Clean Harbors).
JULY 2026 Energy, Power & Environmental	**CORE TRANSFORMERS** *acquired by* **MISSION CRITICAL GROUP** Emerald Lake Capital Management	Mission Critical Group acquired CORE Transformers, a founder-led supplier of new, made-to-order, and remanufactured power transformers (Distribution Strategy Group). Terms were not disclosed.	It was the buyer's second power equipment purchase in four months, after the Texas switchgear maker TxLa Systems.
OCTOBER 2026 Transportation & Logistics	**RXO** *acquired by* **C.H. ROBINSON**	C.H. Robinson agreed on October 5 to acquire RXO, a truck brokerage, managed transportation, and last-mile provider, at an implied value of $5.8 billion, a 29% premium to RXO's last closing price (C.H. Robinson and RXO).	About $300 million of expected annual cost savings supports the price at the top of the brokerage market.
MARCH 2026 Transportation & Logistics	**EELCO** *acquired by* **REDWOOD LOGISTICS** AEA Investors	Redwood Logistics acquired EELCO, a Laredo, Texas, customs brokerage with a foreign-trade-zone warehouse that had been founder-owned since 1991 (FreightWaves). Terms were not disclosed.	Logistics platforms are buying brokers at the border as trade with Mexico sets monthly records.

BENCHMARK® INTERNATIONAL

Transaction values and multiples are as reported by the linked source or calculated from the figures it gives. Company names are the property of their owners and are shown for identification. Two transactions are shown for each of the five industrial sectors across pages 7 and 8.

Transaction values, multiples, and other figures are as publicly reported, and the price of any private company depends on that business. No representation or warranty, expressed or implied, is made in relation to the fairness, accuracy, correctness, or completeness of the information, opinions, or conclusions expressed herein. All forward-looking statements herein involve assumptions and elements of subjective judgment and analysis and are not facts. Past transactions are not indicative of future results, and nothing in this material guarantees future results or performance.

Company names, logos, and trademarks referenced in this material are the property of their respective owners and are used for identification only. Their use does not imply any affiliation with or endorsement by those owners.

This material is only being distributed to, and only made available to, and directed at: (a) persons who are outside the United Kingdom; (b) persons in the United Kingdom who have professional experience in matters relating to investments falling within Article 19(5) of the UK Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended (the "Order"); (c) high net worth entities and other persons to whom it may otherwise lawfully be communicated falling within Article 49(2)(a) to (d) of the Order; or (d) any other person to whom this material may otherwise lawfully be communicated or caused to be communicated (all such persons in (b) to (d) together being referred to as "Relevant Persons"). This material must not be acted on or relied on by persons in the United Kingdom who are not Relevant Persons. In the United Kingdom, any investment or investment activity to which this material relates is only available to, and will be engaged with, Relevant Persons.

How the figures were gathered. Listed-company figures are from StockAnalysis and use reported results. Economic series are from FRED. Benchmark International figures are from the firm's transaction records as of October 1, 2026. Subscription and registration sources that would add depth, including GF Data, PitchBook, and S&P Capital IQ, are listed in a separate one-page companion.
